Lexacom is a trading name of Aprobrium Limited

Introduction

This report of carbon emissions and carbon performance by Aprobrium Limited, declares our commitment to carbon net zero by 2040, as well as setting out our baseline carbon emissions which were initially monitored in the calendar year 2023.

We continue our journey to net zero and are fully committed to doing our part and contributing to our supply chain goals.

At Aprobrium Limited, we supply a global market and recognise that growing carbon emissions causes a global issue of climate change. We look forward to meeting the challenges we face, and working with our supply chain partners to achieve them.

Scope of Aprobrium Limited

Aprobrium Limited comprises a single business entity, which is registered at Companies House, UK:

- Registered office address and place of business: East Court, Hardwick Business Park, Noral Way, Banbury, Oxfordshire, OX16 2AF
- Registration number: 3835983
- SIC Code: 62012 - Business and domestic software development.

Commitment to achieving net zero

Aprobrium Limited is committed to achieving Net Zero emissions by 2045. We recognise and support the Government's commitment to achieving Net Zero emissions by 2050, however, we have made a commitment to more ambitious decarbonisation goals.

For emissions we directly control, we aim to achieve net zero by 2040, with an interim target of an 80% reduction by 2028 to 2032. For emissions we can influence, we aim to achieve net zero by 2045, with an interim target of an 80% reduction by 2036 to 2039.

For the purpose of calculating carbon emissions, Aprobrium Limited has selected to use the:

- Greenhouse Gas Protocol, declared using PAS 2060
- UK Environmental Reporting Guidelines

The reason for this selection is based on the recognition and credibility provided by a nationally accepted standard that takes a business-based view to developing a GHG portfolio. The methodology also allows for the use of Green Gas certificates which may be gained during the carbon reduction projects.

Baseline emissions footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past, and the reference point against which emissions reductions can be measured. The reporting periods for Aprobrrium Limited are set out in the table below:

Period	Detail
Baseline year	January to December 2023
Previous year	January to December 2024
Reporting year	January to December 2025

Table 1: Reporting periods

Scope	Description	Emissions (tCO ₂ e) per year		
		Baseline	Previous	Reporting
Scope 1	Direct GHG Emissions	10.98	10.08	10.17
Scope 2	Purchased Electricity GHG Emissions	10.72	10.75	6.91
Scope 3	<i>Other Indirect GHG Emissions</i>			
	Cat 1: Purchased Goods and Services	34.58	28.56	4.64
	Cat 2: Capital Goods	4.50	7.23	0.12
	Cat 3: Fuel related activities	0.93	0.95	0.72
	Cat 4: Upstream Transportation and Distribution	0.79	0.73	0.56
	Cat 5: Waste	1.32	1.33	0.55
	Cat 6: Business Travel	13.41	5.72	1.66
	Cat 7: Employee Commuting (includes WFH emissions)	15.27	16.25	14.13
	Cat 9: Downstream Transportation and Distribution	15.72	4.73	1.71
	Total (Scope 1, 2 & 3)	108.22	86.33	41.17
	Scope 1 and 2	21.70	20.84	17.08

Table 2: Summary of Scope 1-3 emissions

Emissions reduction targets

In order to continue our progress to achieving net zero by 2050, we project that carbon emissions will decrease to 39.51 tCO₂e by 2029. This is a reduction of 64% since the baseline reporting period.

Progress against these targets can be seen in the graph below:

Graph 1: Emissions reduction targets over the next five years

Completed carbon reduction initiatives

The following environmental measures and projects have been completed or implemented during the reporting year, 2025:

- Business travel was reduced in favour of remote meetings; most client engagements were conducted remotely, and no international travel was undertaken during the year.
- Internal communications were used to engage and educate employees on sustainable practices.
- A new recycling and waste segregation scheme to promote sustainability practices and reduce landfill contributions was introduced.
- Addressed scope 2 emissions further by continuing to invest in LED lighting to replace fluorescent lighting.
- An ongoing internal review of cloud computing services was conducted to identify opportunities to reduce overall usage and associated emissions.

Planned carbon reduction initiatives:

- Maintain our 100% EV fleet of company cars for any future additions.
- Expand the office recycling scheme to include more materials and reduce waste sent to landfill.
- Continue to invest in LED lighting for the office to replace fluorescent lighting.
- Maintain an internal review process for cloud computing services to reduce energy consumption and associated emissions.

These measures, both current and planned, demonstrate our ongoing commitment to reducing our environmental impact and contributing to our supply chain goals.

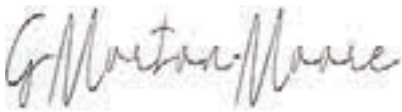

Declaration and sign off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors. For and on behalf of Aprobrium Limited:

G A Murton-Moore, Finance Director, 01/04/2026
